PLEASE Speak for Me!

Thursday April 9, 2020 at 7:00 pm

Many people don’t realize that if they get sick and go to the hospital, the doctors may not speak to your “in case of emergency” person. Why? HIPAA, that’s why!

In the USA, every person over the age of 18 must APPOINT an advocate in order to enable medical professionals to divulge information to them. This is an urgently important matter. But now, you can fix that!

In order to provide printed documents and services required, advance registration is required so we have enough forms on hand.

*Two witnesses will be required, but there should be enough participants to witness for each other.

Tracey S. Lawrence

Author of “Dementia Sucks,” founder of Grand Family Planning LLC, noted speaker and trainer, Tracey will provide attendees with the actual document you need in order to protect yourself. By the end of this lively and informative session, you will leave with the notarized form* you need to make sure you are prepared! Don’t miss it!

To register please stop in the library; call the library at 973-962-6256 X10; or register online at www.ringwoodlibrary.org using the event calendar on the left.
