

From Mashupmath.com:

There are 20 people in a room. If each person shakes every other person's hand only once, how many handshakes are there altogether?

Solution:

$19+18+17+16+15+14+13+12+11+10+9+8+7+6+5+4+3+2+1=190$  total handshakes
