Spring Break Online STEM Program

Tuesday, April 14—Friday, April 17

Why did Pavlov’s dog salivate? Why is a phone number 7 digits long? Why do birds sing? Why can people behave differently when they’re in large crowds. These are all questions in the realm of the science of behavior, or Psychology, and can be answered using the scientific method.

Ringwood residents in grades 6-12 are invited to join Tech Services Supervisor, Heather Caldwell, for 4 days of exploring the scientific process. Concepts of forming hypotheses, designing experiments, selecting variables, and collecting and analyzing data will be discussed. A mixture of instructional methods will be used: reading, watching videos, hands-on practice, and video conferencing.

Our Research? Behavior and Cognition

Our Subjects? Our family members!

Course Requirements:

- Ringwood Library Card
  (a temporary card can be obtained [here](#))
- Google Account and gmail address (not your school account)
  (Go to [Google.com](#) to create a new account.)

Please go to [RPL’s EventKeeper Calendar](#) to register.
Sign up by Sunday 8:00 p.m.
